EDUCATION

University of Southern California, Los Angeles, CA

Aug 2025 – May 2027 (Expected)

Master of Science in Computer Science

University of Mumbai, Mumbai, India

Jul 2019 – May 2023

Bachelor of Engineering in Computer Engineering

GPA: 9.37/10

EXPERIENCE

Associate Consultant (Software Engineer), Intellect Design Arena Ltd., Mumbai, India

Aug 2023 – Jul 2025

- Developed, enhanced, maintained backend services and RESTful APIs using Java and Spring Boot for enterprise-SaaS fintech application built on microservices architecture, supporting scalable, multi-tenant deployments.
- Built an AI-powered automated loan initiation backend system that parses inbound emails, validates inputs, persists structured data in Oracle/PostgreSQL, and integrates with downstream systems via REST APIs, reducing loan initiation time by 80% while supporting risk management.
- Migrated core backend services from Java 8 to Java 17 and Spring Boot 2.x to 3.x, upgrading dependencies, refactoring legacy code, and ensuring zero functionality loss in production. Designed backend logic for dynamic document requirement generation, improving onboarding workflows and system configurability.
- Engineered a high-performance Rule Engine using an organization-specific orchestration framework with custom assessment methods and formulae to evaluate customer and transaction risks, integrating REST APIs for seamless data handling and achieving 70% faster processing with reduced human intervention compared to legacy calculators.
- Collaborated in Agile development environment, participating in sprint planning, bug fixing, code reviews, debugging, unit testing, and CI/CD-driven deployments, ensuring clean, maintainable, and well-documented code.

Robotics Kit Developer Intern, IITians Curious Minds, Mumbai, India

Jun 2022 – Jul 2022

- Developed and tested Arduino-based embedded programs with C/C++ (Arduino IDE), strengthening fundamentals in low-level programming and debugging.
- Assembled and optimized robotics kits used by students, collaborating with instructors to simplify complex technical concepts.

PROJECTS

Ecommerce Website [Spring Boot, Angular, MySQL] [[GitHub](#)]

- Developed a Spring Boot based backend with JWT authentication and role-based access control, persisting data in MySQL using Hibernate/JPA.
- Designed and implemented RESTful APIs for product catalog, cart management, and checkout workflows, ensuring clean separation of concerns.
- Integrated Razorpay payment gateway with secure order creation and payment verification handled on the backend.

Event Search System [HTML, CSS, JavaScript, Python, Google Cloud Platform] [[GitHub](#)]

- Built a full-stack event search tool by engineering a Python (Flask) backend and a responsive JavaScript frontend.
- Orchestrated the integration with external REST APIs for event and geocoding data, ensuring all the API keys were secured on the server-side. Deployed the application to the Google Cloud Platform (App Engine).

Tic-Tac-Toe [React, Typescript, Vite, and Minimax AI] [[GitHub](#)]

- Developing an AI-driven, responsive Tic-Tac-Toe application supporting PvP and PvAI modes using React, Typescript. Implementing the Minimax decision algorithm for optimal AI moves and structuring game logic with a Reducer + Custom Hooks architecture to enable time-travel, undo/redo, and predictable state transitions.

Online Banking System [Java, HTML, CSS, JavaScript, and Oracle] [[GitHub](#)]

- Implemented a Java based backend using Servlets connected to an Oracle database.
- Developed APIs for account creation, deposits, withdrawals, and transaction history, with validation and persistence logic.

Patient Record Management System [PHP, HTML, CSS, JavaScript, and Xampp Server] [[GitHub](#)]

- Developed a web-based patient management system with role-based authentication for admins and patients. Implemented appointment scheduling, patient record management, and room allocation using PHP, and MySQL.

SKILLS

Languages: Java, Python, Node.js.

Backend: Spring Boot, RESTful APIs, Flask, Fast API.

Frontend: Angular, TypeScript, HTML, CSS, JavaScript, React.

Databases: MySQL, SQL, Oracle, Postgres, MongoDB.

Cloud & Tools: GCP, Postman, Git, JIRA, CI/CD (Jenkins), AWS, Azure.

Other Skills: Code Review, Debugging, Unit Testing, Problem-solving, Communication, Agile, Software Development Lifecycle (SDLC).
